

As you referenced in your letter, your station is currently being carried on Charter's Turlock and Livingston, California cable systems. Our Turlock, California system serves communities located in Merced, San Joaquin and Stanislaus counties. Our Livingston, California system serves communities located in Merced county. According to the FCC's TVQ TV Database Query (available at <http://transition.fcc.gov/mb/video/tvq.html>) there are two full power broadcast stations licensed to counties served by these systems. KBSV-DT is licensed to Ceres, CA (Stanislaus County) and KNSO-DT is licensed to Merced, CA (Merced County). Since these two full power stations are licensed to counties served by these Charter systems, your station is not a qualified low power station on these systems.

You raise a number of points in your letter but none address or contradict the fact that KAZV-LP does not and cannot satisfy the FCC's rules with respect to being a qualified low power station on Charter's cable system. We believe that your assertion that KAZV-LP is *qualified* is misplaced and that your station is not guaranteed or entitled to carriage on our systems.

Ms. Ludovici sent you advance notice on January 10, 2012 that your station was being removed from Charter's systems on or after March 1, 2012, see attached. We have also provided our customers with more than thirty days notice of this removal and received very few concerns. We believe that this removal is in the best interest of our customers and the communities we service. We will continue to provide a number of channels with high quality, local programming content to our valued customers. We believe that any further delay of this removal is unwarranted.

If you have any questions please do not hesitate to contact me directly at the above address.

Most Sincerely,

Director and Sr. Counsel
Charter Communications, Inc.
